#	ID	Object Text
2		**2 Localization requirements**
2.1	**HD-001**	The map-relative accuracy error shall not exceed 0.1 m.
2.2	HD-002	The localization estimate shall be available at 10 Hz.
2.3	HD-003	The localization latency shall not exceed 50 ms.

HD Map Localization - GPS is not the Solution!

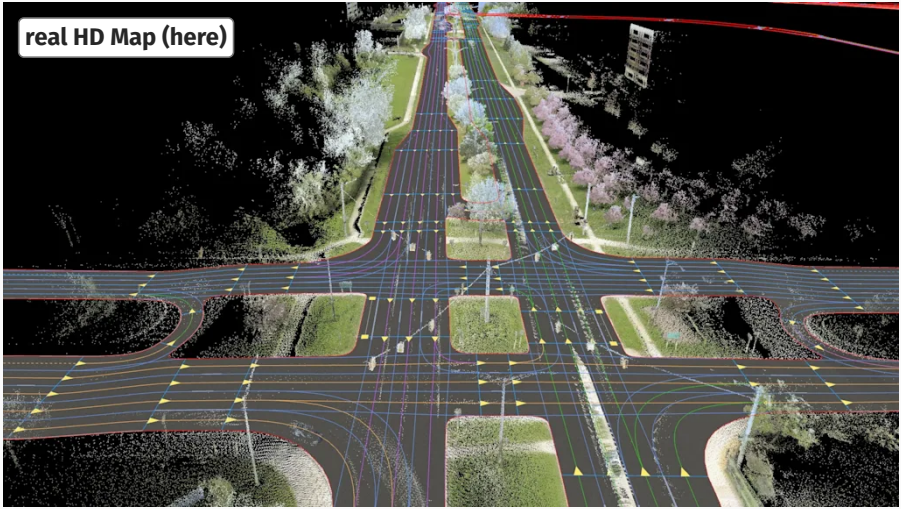

KITTI used a combined GPS/IMU system with **Real-Time Kinematic (RTK) correction**, which provides a localization accuracy/error of approximately **5 cm.** KIT - Karlsruher Institut für Technologie +1

Die Kontinentaldrift in Europa beträgt für den Zeitraum 2011–2026 (15 Jahre) insgesamt etwa **15 cm bis 60 cm**, da sich die eurasische Landmasse je nach Region um **1 cm bis 4 cm pro Jahr** verschiebt. Geo.de +1

Die GPS-Genauigkeit von Smartphones auf Google Maps liegt im Freien meist bei etwa **5 bis 20 Metern** Google Help. Satellitenbilder bieten in Städten teilweise eine Auflösung von bis zu **50 cm**, die absolute Positionsgenauigkeit der Karten kann durch Verzerrungen aber um **bis zu 10 Meter oder mehr** abweichen. Google Help +2
